The key thing to remember is to keep your response related to the job. If your educational background has led you in a certain direction, bring that into the overview. Or, talk about your most valuable activities in college or your goals and dreams. Remember, be specific and don't ramble!'. A URL is provided below the response: <http://www.jobsvr.eiu.edu/students/interviewing/Interviewresponse.htm>. On the left side, there is a vertical menu with buttons for 'Topics Table', 'Stop Audio', 'Previous', 'Next', and 'Repeat Question'. Repeat Question

Decision Making & Problem Solving - Question # 1 of 9

Question:
Give me an example of a time when you had to keep from speaking or making a decision because you did not have enough information.
<http://www.brockport.edu/career/behave.htm>

Situation or Task: Describe the situation that you were in or the task that you needed to accomplish. You must describe a specific event or situation, not a generalized description of what you have done in the past. Be sure to give enough detail for the interviewer to understand. This situation can be from a previous job, from a volunteer experience, or any relevant event.

Action you took: Describe the action you took and be sure to keep the focus on you. Even if you are discussing a group project or effort, describe what you did -- not the efforts of the team. Don't tell what you might do, tell what you did.

Results you achieved: What happened? How did the event end? What did you accomplish? What did you learn?
